Contents

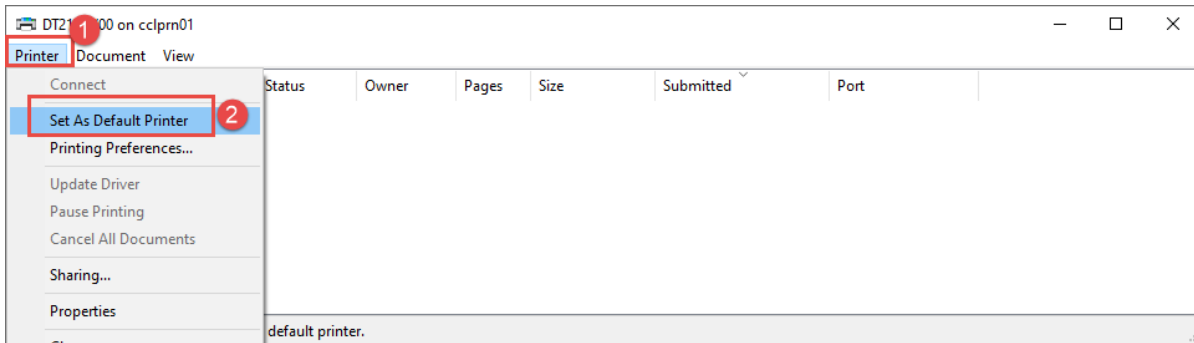

Add Printer to Computer	2
Add Printer to NAXT Profile	3

Add Printer to Computer

1. Open a File Explorer window
2. In the address bar, type in **\\cclprn01** then the name of the printer you are after
3. Press enter

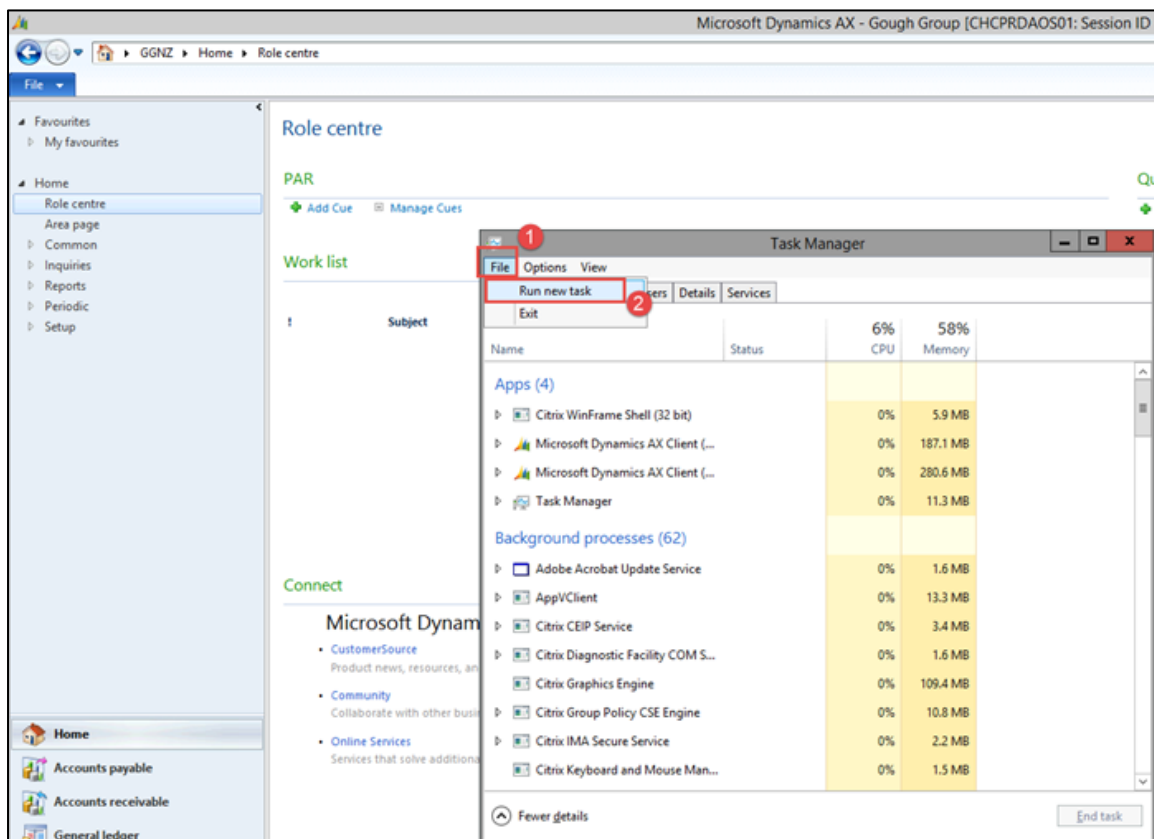

- Once the printer has installed, this window will open and in here you can set the printer as your default

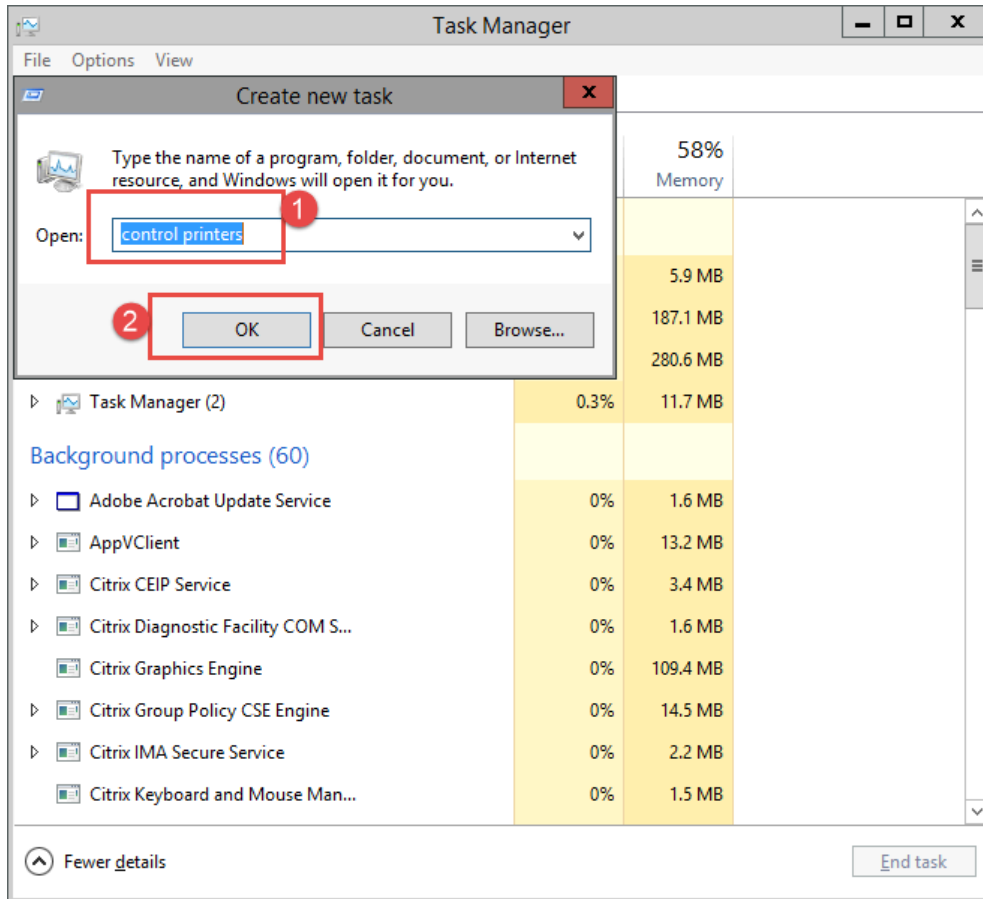

Add Printer to NAXT Profile

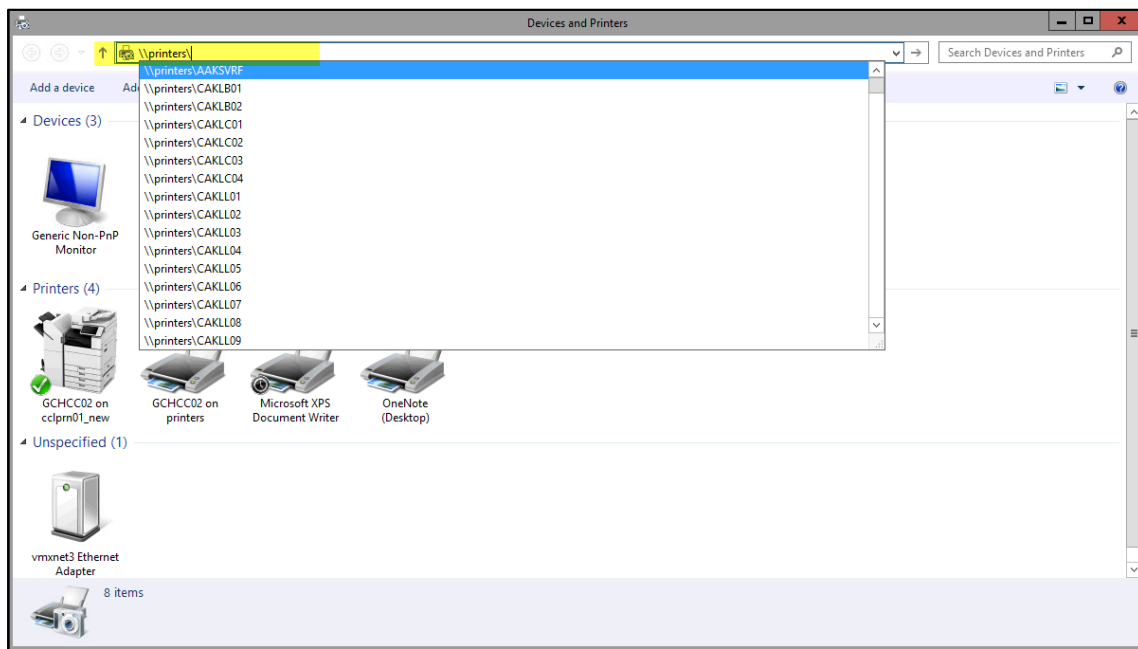

- Open NAXT
- Press CTRL F3 on your keyboard > Task Manager window will open
- File > Run new task

4. Type in **Control Printers** like below
5. Click **OK**

6. In the devices and printers window that opens, in the address bar at the top, type in **\\printers** then the name of the printer you are after
7. Press enter

8. Then to set a printer as your default, right click on the printer and select **Set as default printer**
