Instructions on switching cube connections in Excel

***Note** make sure you have a connection to the cube already before you switch connections. Use the [Instructions on accessing Terra CAT Cubes](#) to create the connections

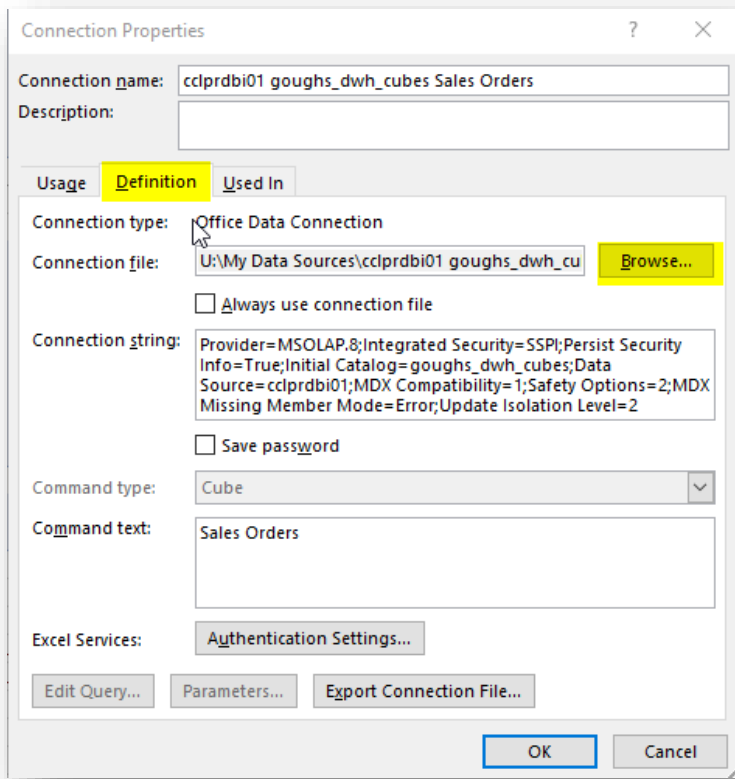

Click on the Pivot field or table

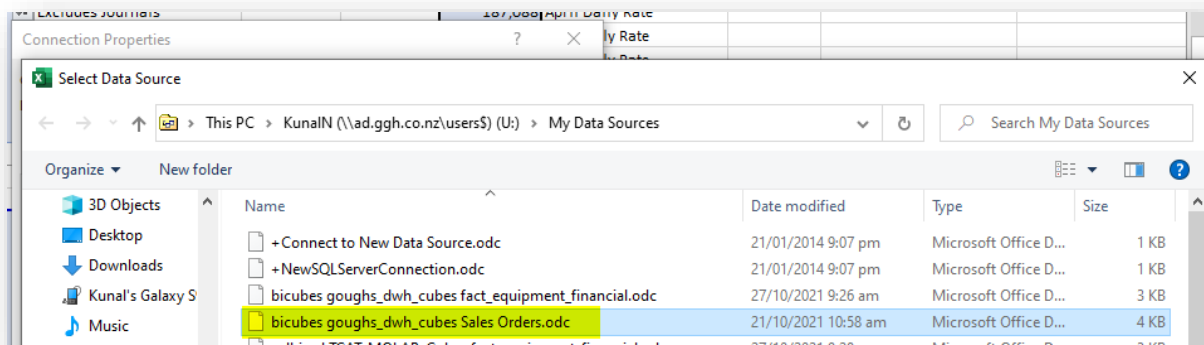

From the Data menu select properties:

In the Connection Properties go to the Definition tab and in the connection file click Browse.

Select the correct connection and click open

Click Ok in the Connection Properties window to apply changes.
If you see this message, click Yes to make changes
