Builder G3 Versions

The new version of Builder G3 v1.5.1 is now available. Determine what install package(s) you require. Download and unzip the installation files and review the release notes and install instructions before installing.

Please work with your local IT representative to pick the right package to download and install.

- **BuilderG3 1.5.1 Upgrade 64bit** - For users that are running any previous version of Builder G3 and would like to upgrade to 1.5.1. This is for users that use local and/or SQL Server Builder databases. This upgrade will require that the PC is running a 64bit Windows operating system.
- **BuilderG3 1.5.1 No Local DB 64bit** - This package is for users that **do not use** Builder Databases on their local PCs. They **only** use SQL Server Builder Databases. This upgrade will require that the PC is running a 64bit Windows operating system.
- **BuilderG3 1.5.1 Database Utility 64bit** - Required to manage SQL Server Builder Databases. To be installed by SQL Administrators on the MS SQL server that is housing the Builder G3 databases.
- **BuilderG3 1.5.1 Full Install 64bit** - Full install package for Windows 7, Windows 8.1, and Windows 10 users that use Builder Databases on their local PCs. You will also be able to connect to SQL Server Builder databases with this package. This install will require that the PC is running a 64bit Windows operating system. This package is for users that **do not** already have a previous version of Builder installed

- **BuilderG3 1.5.1 Upgrade 32bit** - For users that are running any previous version of Builder G3 and would like to upgrade to 1.5.1. This is for users that use local and/or SQL Server Builder databases.
- **BuilderG3 1.5.1 No Local DB 32bit** - This package is for users that **do not use** Builder Databases on their local PCs. They **only** use SQL Server Builder Databases
- **BuilderG3 1.5.1 Database Utility 32bit** - Required to manage SQL Server Builder Databases. To be installed by SQL Administrators on the MS SQL server that is housing the Builder G3 databases.
- **BuilderG3 1.5.1 Full Install 32bit** - Full install package for Windows 7, Windows 8.1, and Windows 10 users that use Builder Databases on their local PCs. You will also be able to connect to SQL Server Builder databases with this package. This package is for users that **do not** already have a previous version of Builder installed
